

Do you know what to do if your house is on fire?

First of all **TRY** and remain calm. If there is a lot of **SMOKE** in the room, **CRAWL** down on the floor out of the house. If a door is closed, **FEEL** the door with your hand first, and if it is hot to the touch don't open it! Always have several **EXITS** in mind out of a room or home. Go to a **NEIGHBOR'S** house and **DIAL 911**. Emergency personnel will be there as quick as possible. Here are some additional safety tips to protect yourself and your home. Keep a **FLASHLIGHT** by your bed in case the power goes out. Always have smoke **DETECTORS** installed throughout your house. **CHECK** the **BATTERY** in each detector at least twice a year.

Fit the bold words above into the spaces below to find the secret message in the box!
