

# Do a Doubletake!

Print this page out twice and glue some thin cardboard to the back of each page. Cut each square out for a total of 24 squares or 12 identical pairs of people. Flip the picture side down and shuffle the squares. Arrange them into any pattern (4 rows of 6 across for example) and turn two squares over. If they match try to find the next pair until you have found them all. Take turns with two or more players to match up pairs, the one with the most pairs wins! Color each pair identically to make the game even more fun!
